

March 3, 2018

Attention: Members of the Wollaston Lake Home and Cottage Association (WLHCA),

Subsequent to sending a letter to WLHCA members by email or regular mail on March 1, 2018, additional information has come forward that clarifies and to some degree changes some of the information provided in that letter. I would like to clarify this information as quickly as possible to avoid confusion and misunderstanding.

Our letter stated that, “The third issue relates to the campground’s septic and water servicing systems. The proposed amendment seeks to remove the requirement that the Ministry of the Environment and Climate Change grant the campground an Environmental Compliance Approval.” We now know that this is incorrect.

Contrary to what was written in the letter, Jennifer Cohen, Clerk of Wollaston Township, has advised us that the proposed amendment DOES NOT seek to remove the requirement that the Ministry of the Environment and Climate Change (MOECC) grant the campground an Environmental Compliance Approval (ECA). She confirmed that the campground must have a septic system approved by the MOECC and this will remain a requirement within the by-law.

I apologize for any confusion or misunderstanding that our initial statement may have caused. Please continue to monitor the website and Facebook site for updates and further information.

I hope that you will be able to attend the Public Meeting on Friday, March 9 at 6:30 p.m. at the Wollaston Community Centre. If you are unable to attend, I encourage you to let your views be known regarding the proposed amendments to Zoning By-Law 10-15 by emailing Jennifer Cohen, Clerk, Wollaston Township at [clerk@wollaston.ca](mailto:clerk@wollaston.ca) or by fax at 613-337-5789.

Yours sincerely

Peggy Stewart,

President, Wollaston Lake Home and Cottage Association
